

## HIT HEALTH SYSTEM REVIEW

# Presentation of country report – Portugal

Lisbon, Instituto de Higiene e Medicina Tropical, 27 April 2017 (10.00-12.30)

As part of its Health Systems in Transition (HiT) series, the European Observatory on Health Systems and Policies systematically describes the functioning of health systems in countries as well as reform and policy initiatives in progress or under development. The HiT health system reviews cover the countries of the WHO European Region as well as some additional OECD countries. Each review is produced by country experts in collaboration with the Observatory's research directors and staff. In order to facilitate comparisons between countries, the reports are based on a common template. HiT reviews seek to provide relevant information to support policy-makers and analysts in the development of health systems in Europe. They are updated on a regular basis.
