## **Postdoctoral Fellowship Announcement in Public Health at the Paulista School of Medicine of the Federal University of São Paulo (EPM-Unifesp)**

The announced Post-Doctoral (PD) scholarship opportunity has been awarded to Escola Paulista de Medicina – UNIFESP by the São Paulo State Research Support Foundation (FAPESP) as part of the financing of the thematic project: “Cartography of Specialized Care in the System Unified Health System (SUS): formulation, training and management in care networks” which is coordinated by Ph.D. Professor Ademar Arthur Chioro dos Reis and guided by Ph.D. professor Rosemarie Andrezza.

The postdoctoral fellowship lasts 24 months and can be extended as needed by the project. The PD fellow's responsibilities include exclusive dedication to fulfilling the work plan and research, collaboration with other ongoing projects, participation in regular scientific meetings, writing articles and disseminating the results of their research at scientific events.

In Brazil, specialized care (AE) is a field of disputes involving complex, antagonistic and diffuse interests. A scenario delineated by different actors, institutions and powers, it is characterized as one of the main “critical nodes” of the Sistema Único de Saúde (SUS). A situation that also occurs in other health systems around the world. The search for guaranteeing the universal right to health, in an equitable and comprehensive manner, necessarily involves improving access and care provided in different health services, particularly in specialized care, needed by people at different moments in their lives.

In this way, the objectives to be achieved by the post-doctoral fellow linked to the Cartography of Specialized Care Research Project in Brazil are:

- 1) Analyze the situational diagnosis of specialized care in Brazil to understand the barriers to access and the production process: queues for surgeries, consultations, diagnostic exams and procedures in collaboration with public health workers, managers and users analyzing the management, governance and care process in the Specialized Care network in public health;
- 2) Prospect innovative solutions and practices for care management and governance of Specialized Care, supporting the formulation and implementation of the Specialized Care Policy in Brazil.

### **Expected Products**

Universidade Federal de São Paulo  
Escola Paulista de Medicina  
Departamento de Medicina Preventiva

Submission of 2 (two) scientific articles to a scientific journal in the area;

Research Reports;

Teach classes in the Postgraduate Course in Public Health at Unifesp linked to the research topic with the postdoctoral advisor.

### **How to Apply:**

Application criteria:

Brazilians and foreigners with a doctorate in collective health, public health or social psychology, obtained less than 7 (seven) years ago. To occupy the vacancy, it will be a criterion that the candidate must reside in the city of São Paulo - SP, the city of the Project's Host Institution.

For the position, the candidate must have competencies (knowledge, skills and attitudes) in specific areas of Public Health: Continuing Health Education; Health Policy, Planning and Management; Health Care Management. Therefore, it is essential that the scholarship holder has training and experience in these fields, acquired both through their academic career, as well as professional experience in the area of care management and continuing health education.

Experience in research methodologies, processing and analysis of qualitative data is required, proven through participation in research projects of a qualitative nature with the themes of planning and continuing education in health. It is essential that the candidate has experience writing scientific articles and at least one article published in an indexed scientific journal, Qualis "A" in the area of collective health or interdisciplinary field, published in a foreign language. Experience in higher-level teaching of at least 2 (two) years in health courses.

The following documents must be attached to the e-mail:

Letter of intent of up to two pages, justifying the potential for contribution and adherence to the project;

Universidade Federal de São Paulo  
Escola Paulista de Medicina  
Departamento de Medicina Preventiva

Curriculum summary with the characteristics requested by FAPESP (<https://fapesp.br/5266>);

Proof of 2 (two) years of higher-level teaching experience;

Proof of residence in São Paulo, capital;

Proof of experience in a qualitative research project and work with continuing health education actions;

Copy of the Undergraduate and Postgraduate Certificate (master's and doctorate);

Copy of the article in a foreign language;

Updated Lattes curriculum.

## SELECTION SCHEDULE

Application period: **until April 14, 2024.**

Interested candidates should send their documentation to the email [projetoaes.fapesp@gmail.com](mailto:projetoaes.fapesp@gmail.com) with the subject: "PD SCHOLARSHIP – Specialized Care".

The selection of the candidate for the scholarship will be done in two phases:

- 1) Analysis of registration documentation;
- 2) Interview with pre-selected candidates on **April 16, 2024.**

## RESULTS

The result of the first stage and the call for the interview process will be communicated to all candidates by email on **April 15, 2024.**

The final result after the interview will be communicated to all candidates **on April 20, 2024.**

Commencement of the scholarship period: After approval of the FAPESP selection process.

Selected candidates will receive R\$ 9,047.40 (Nine thousand, forty-seven reais and forty cents) monthly. Further information about the scholarship can be found at: [www.fapesp.br/bolsas/pd](http://www.fapesp.br/bolsas/pd).
